DETAILED ACTION

1. Claims 33-41, 43, 44, 47-52 are pending.

Amendments

2. The claims were amended, submitted, filed with arguments and entered 5/17/2005, but were found non-responsive for being drawn to a different invention (see Office communication, mailed 8/3/2005). These claims, as currently amended 5/17/2005, were amended again and filed 9/1/2005, with arguments.

3. In the interest of compact prosecution the claims entered 9/1/2005 will be examined and are subject to the species presented here below. Restriction is proper, as claims 33-41, 43, 44, 47-52 have never been examined.

4. The examiner respectfully notes that unresponsive claims, entered 5/17/2005, were filed with arguments. It is unclear if or how those arguments pertain to the currently amended claims and their accompanying arguments, entered 9/1/2005. The examiner respectfully requests that the applicant make clear on the record, which arguments, filed 8/3/2005, in response to the previous Office action, mailed 2/18/2005, are currently in effect and to what extent.

Election/Restrictions

5. This application contains claims directed to the following patentably distinct species of the claimed invention: A detectable label that is (a) a luminescent label, (b) fluorescent label, (c) a primary label or (d) a secondary label.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 33, 47-49 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 1639

the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
